FRONT PAGE

We help industries keep running by providing fast-response engineering support, reliable procurement and technical expertise that prevents costly downtime.

COVER

WILSOLVEWEL NIGERIA LIMITED

Engineering | Procurement | Technical Support & Maintenance

Reducing Equipment Downtime.
Delivering Reliable Engineering Solutions.
Supporting Industrial Operations Across Nigeria.

Wilsolvewel Nigeria Limited is an indigenous engineering and industrial support company providing **engineering services, procurement & international logistics and technical support & maintenance** to organizations that depend on reliable equipment and infrastructure to operate efficiently.

We partner with clients to **solve critical operational challenges**, protect equipment investments and ensure projects and facilities perform safely, efficiently and without disruption.

COPERATE OVERVIEW

Wilsolvewel Nigeria limited is fully indigenous engineering, procurement and technical support company offering high performance **solution across Nigeria's Oil & Gas, Energy & Power Generation, Construction & Civil Works, Industrial & Manufacturing Facilities, Government & Corporate Infrastructures.** Founded in 2021. We have built a strong reputation for delivering quality services that minimize downtime, enhance productivity and ensure operational safety.

Our legal registration under Nigeria law and strict adherence to industry standards position us as a trusted partner for local and international clients.

Our promise: At Wilsolvewel, we deliver value through innovation, integrity and engineering excellence. We're committed to optimizing your equipment's performance while ensuring safety, cost-efficiency and sustainability.

WHO WE SERVE (INDUSTRIES & DECISION-MAKERS)

Industries We Serve

Wilsolvewel supports organizations across key sectors, including:

- Oil & Gas
- Power Generation & Utilities
- Manufacturing & Industrial Plants
- Construction & Infrastructure Projects
- Government and Corporate Facilities

Decision-Makers We Work With

Our services are structured to support:

- Project Managers
- Plant & Operations Managers
- Maintenance Managers
- Engineering Managers
- Procurement & Supply Chain Managers

We understand the **technical, operational and commercial pressures** faced by decision-makers and align our services to meet their performance, safety and cost objectives.

PROBLEMS WE SOLVE

Industrial operations and infrastructure projects commonly face:

- Equipment breakdowns leading to production losses and project delays
- Poorly designed or executed civil foundations affecting equipment performance
- Counterfeit or substandard spare parts causing repeated failures
- Delayed imports and unreliable logistics disrupting maintenance schedules
- Lack of skilled technical support for complex equipment and power systems

Wilsolvewel exists to **eliminate these challenges** by delivering reliable engineering, controlled procurement and fast-response technical support backed by experience and professionalism.

Our Services

A. Engineering Services
B. Procurement & International Logistics
C. Technical Support & maintenance

A. ENGINEERING SERVICES

Civil & Structural Engineering for Heavy Equipment & Industrial Operations

Overview

Wilsolvewel Nigeria Limited provides specialized **civil drawings and design documentation**, **civil and structural engineering services** designed to support heavy-duty machinery, industrial equipment and infrastructure projects. Our engineering solutions focus on **structural integrity, load safety, durability and long-term operational reliability**, ensuring that equipment installations perform optimally throughout their service life.
We support projects from **engineering design through construction execution**, integrating civil works with mechanical and equipment requirements to eliminate interface risks, premature failures and costly downtime.

Client Challenges We Address

Industrial and infrastructure projects often suffer from:

- **Weak or improperly designed equipment foundations** leading to vibration, misalignment and premature equipment failure
- **Structural failures and cracks** caused by incorrect load calculations, poor soil consideration or substandard construction
- **Project delays and rework** resulting from poor coordination between civil, mechanical and equipment installation phases
- **Non-compliance with engineering and safety standards**, exposing clients to operational and regulatory risks

Wilsolvewel addresses these challenges by delivering **engineering-led civil solutions** that are technically sound, compliant and fit for purpose.

Our Engineering Solutions

We deliver a full range of **industrial civil and structural engineering services**, including:

- **Equipment base and foundation design & construction** tailored to equipment load, vibration and operating conditions
- **Structural civil works** for industrial plants, machinery installations and infrastructure facilities
- **Concrete platforms, plinths and reinforced structures** designed for heavy equipment and dynamic loads
- **Civil engineering preparation for equipment installation**, ensuring accurate alignment, stability and safety
- **Integrated civil execution** that supports mechanical, electrical and equipment installation activities

All works are executed in accordance with **engineering best practices, safety standards and project specifications**.

Clients engage Wilsolvewel for engineering services because we offer:

- **Engineering-led execution** backed by practical industrial experience
- **Strict adherence to safety, load-bearing and structural integrity standards**
- **Seamless integration with procurement and equipment installation**, reducing project interfaces and delays
- **Durable, cost-effective solutions** that protect equipment investment and minimize lifecycle maintenance costs
- **Professional documentation and technical compliance** for client assurance and audit

Ideal Applications

Our engineering services are best suited for:

- **Factories and manufacturing plants**
- **Power plants and energy facilities**
- **Construction and infrastructure projects**
- **Industrial equipment and machinery installations**

Engage Wilsolvewel Nigeria Limited to assess your site, design and execute reliable civil foundations and prevent structural failures that lead to costly downtime and equipment damage.
We deliver engineering solutions that ensure **strength, stability, safety and long-term performance**.

B. PROCUREMENT & INTERNATIONAL LOGISTICS

Reliable OEM & OEM-Equivalent Parts Without Supply Delays

Wilsolvewel Nigeria Limited delivers **structured procurement and international logistics solutions** that ensure the timely supply of genuine OEM and approved OEM-equivalent spare parts, tools and industrial consumables for critical equipment and operations.

We manage the **entire supply and logistics chain**, from technical sourcing and supplier verification to global pickup, international shipping, customs clearance and final delivery. Beyond parts procurement, we also provide **international logistics support for client-owned materials**, arranging pickup from **any global location** and shipping via our trusted sea-freight partners.

Our services are designed to **eliminate counterfeit risks, prevent import delays and ensure full traceability**, while maintaining cost efficiency and schedule reliability.

OUR PROCUREMENT CAPABILITY

We provide structured sourcing for:

- Industrial equipment and components
- Mechanical and rotational systems
- Electrical and instrumentation materials
- Hydraulic systems and accessories
- Specialized and hard-to-source materials

Client Challenges We Address

Organizations operating heavy equipment and industrial systems commonly face:

- **Counterfeit or substandard spare parts** that lead to repeated failures and equipment damage
- **Delayed imports and inconsistent delivery timelines**, causing prolonged downtime and project disruption
- **Unverified or untraceable suppliers**, exposing clients to quality, compliance and financial risks
- **High procurement costs** due to poor sourcing strategies and inefficient logistics planning

Wilsolvewel addresses these challenges by implementing **controlled, transparent and traceable procurement processes** supported by global supplier networks.

Our solutions include:

- **OEM and approved OEM-equivalent sourcing** from verified manufacturers and authorized distributors
- **Global pickup of materials and equipment** from any international location
- **International sea freight using** 20-foot and 40-foot containers
- Customs clearance and regulatory compliance
- Final delivery aligned with client project timelines

Our procurement capability covers spare parts and support equipment for major industrial and heavy-duty brands, including:

Caterpillar | Cummins | Perkins | Terex | Schwing

You can trust Wilsolvewel for procurement and logistics because we offer:

- **Verified and reputable global suppliers**, reducing the risk of counterfeit parts
- **End-to-end traceability**, from sourcing through delivery
- **Cost-controlled procurement strategies** without compromising quality
- **Reliable logistics planning** aligned with project timelines
- **Professional documentation and transparency** for audit and compliance purposes

Send us your parts list or equipment requirements.
Wilsolvewel Nigeria Limited will source, ship, clear and deliver genuine components efficiently — ensuring your operations remain uninterrupted.

HYDRAULIC PUMP SOLUTION: SUPPLY, COMPONENTS & REFURBISHMENT SUPPORT

We Supply Genuine Hydraulic Pumps. Provide OEM-grade Components. Cost-Effective Restoration. Reliable Performance.

Hydraulic pumps are critical to industrial productivity across construction, oil & gas, marine, manufacturing and heavy equipment operations. When internal components begin to wear, performance declines — leading to reduced efficiency, pressure instability, leakage, and eventual system failure.

At Wilsovlewel Nigeria Limited, we provide structured sourcing and supply of genuine hydraulic pumps, internal components enabling clients to refurbish or remanufacture existing pumps at significantly lower cost than full unit replacement.

Rather than purchasing an entirely new pump assembly, many systems can be restored to optimal performance through professional refurbishment supported by authentic replacement components.

OUR HYDRAULIC PUMP SUPPLY CAPABILITY

We specialize in sourcing and supplying internal components and accessories for various types of hydraulic pumps, including:

- Piston Pumps (Axial & Radial)
- Gear Pumps
- Vane Pumps
- Variable Displacement Pumps
- Fixed Displacement Pumps

We supply components for industrial, construction, marine, and oilfield hydraulic systems.

COMPONENTS WE SUPPLY

Our hydraulic pump parts sourcing includes:

- Cylinder blocks
- Pistons & piston shoes
- Valve plates
- Swash plates
- Drive shafts
- Bearings & bushings
- Seal kits & gasket kits
- Retainer plates
- Thrust plates
- Pressure compensators
- Port plates
- Control assemblies
- Complete internal rebuild kits
- External accessories and fittings

All components are sourced through verified manufacturers and trusted global suppliers to ensure dimensional accuracy, material integrity and operational compatibility.

REFURBISHMENT SUPPORT THROUGH PARTS SUPPLY

If your hydraulic pump requires remanufacturing or refurbishment, we provide the internal components necessary to restore functionality.

You may:

- Supply the exact part numbers required
- Provide details of specific worn components
- Request a complete internal replacement kit
- Provide the pump model and data plate specifications

Once specifications are received, we will identify and source compatible genuine or OEM-equivalent internal components for your system.

In many cases, refurbishing a pump using authentic internal components significantly reduces capital expenditure compared to purchasing a new pump assembly.

Our goal is to support cost-effective restoration without compromising performance.

WHAT WE REQUIRE FROM YOU

To ensure accurate sourcing, we request the following:

1. Pump Manufacturer Name
2. Pump Model Number
3. Serial Number
4. Displacement specification
5. Pressure rating
6. Photos of pump data plate (if available)
7. List of required parts (if known)

With accurate specifications, we ensure precision sourcing and compatibility.

WHY REFURBISH INSTEAD OF REPLACE?

Hydraulic pumps often fail due to internal wear of serviceable components rather than total structural damage.

Refurbishment advantages include:

- ✔ Lower overall cost compared to new pump purchase
- ✔ Reduced equipment downtime
- ✔ Faster restoration timeline
- ✔ Retention of existing mounting compatibility
- ✔ Sustainable asset management

Where refurbishment is technically viable, it is often the most economically efficient solution.

QUALITY & AUTHENTICITY ASSURANCE

All hydraulic components supplied through our procurement network undergo:

- Supplier verification and due diligence
- Dimensional and specification confirmation
- Material grade verification (where applicable)
- Traceable sourcing documentation

We prioritize genuine OEM or high-quality OEM-equivalent components depending on client requirements and budget considerations.

Restore Your Hydraulic Pump Performance Today

If your hydraulic pump requires internal component replacement or complete refurbishment support, contact our procurement team with your pump specifications.

We will source the appropriate genuine components and coordinate safe, structured delivery.

STRATEGIC GLOBAL SOURCING SOLUTIONS

Precision Procurement for Specialized and Hard-to-Source Materials

Industrial operations frequently require components and materials that are technically specific, time-sensitive, or difficult to source through conventional supply channels. Delays in obtaining the correct parts can result in extended downtime, operational inefficiencies and financial losses.

At Wilsovlewel Nigeria Limited, we provide structured global sourcing services designed to identify, verify and supply industrial materials based strictly on client specifications.

If you are experiencing difficulty sourcing a required component, our procurement team can support you — provided accurate technical specifications are supplied.

We do not engage in speculative sourcing.
We source precisely what you specify.

Our General Sourcing Capability Covers:

We support procurement across multiple industrial categories, including but not limited to:

IT & Technical Equipment

- Industrial networking hardware
- Control system components
- Data acquisition systems
- Servers and specialized industrial computing equipment
- Industrial-grade peripherals

Valves & Flow Control Systems

- Gate valves
- Globe valves
- Ball valves
- Butterfly valves
- Bellow seal valves
- Strainers
- Actuators and valve accessories

Electrical Components

- Switchgear
- Circuit breakers
- Control panels
- Transformers
- Cables and cable management systems
- Protection relays
- Industrial lighting systems

Rotational Equipment & Mechanical Components

- Pumps (various types)
- Compressors
- Gearboxes
- Motors
- Couplings
- Bearings
- Sealing systems

Instrumentation & Control Equipment

- Pressure transmitters
- Temperature sensors
- Flow meters
- Level controllers
- Calibration devices
- Control valves
- Monitoring systems

Our sourcing scope extends to both OEM and verified OEM-equivalent manufacturers, depending on client preference and operational requirements.

Specification-Driven Procurement

To ensure accuracy and compatibility, we require complete material specifications, which may include:

- Manufacturer name (if known)
- Model number
- Part number
- Technical datasheet
- Performance parameters
- Operational rating
- Quantity required
- Installation environment details (if applicable)

With detailed specifications, our procurement team conducts supplier identification, verification, and authenticity checks before recommending sourcing options.

This structured approach eliminates the risks associated with incorrect part supply, counterfeit materials or incompatible substitutes.

Supplier Verification & Authenticity Control

Every sourcing engagement follows a defined process:

1. Technical specification review
2. OEM identification or equivalent manufacturer search
3. Supplier due diligence and verification
4. Pricing and lead time analysis
5. Client approval before procurement
6. International freight coordination
7. Customs documentation and clearance

8. Final delivery coordination

Our objective is not merely to supply materials — but to deliver verified, compliant and operationally reliable components.

When to Engage Our Sourcing Team

You should engage us when:

✔ Your internal procurement team cannot locate a required component
✔ The OEM has long lead times
✔ You require verified alternative manufacturers
✔ You want structured supplier authentication
✔ You need international logistics coordination
✔ You want to reduce counterfeit risk

We operate as an extension of your procurement department — bringing global supplier access and technical screening capability.

Compliance & Documentation

All sourced materials are supported by:

- Supplier documentation
- Commercial invoices and packing lists
- Traceability documentation (where applicable)
- Compliance declarations (if required)

Transparency and documentation integrity are core to our procurement system.

Strategic Advantage

By leveraging our global supplier network and technical sourcing methodology, clients benefit from:

• Reduced procurement delays
• Access to verified manufacturers
• Lower risk of counterfeit components
• Transparent documentation
• Structured import logistics management

Our procurement capability supports operational continuity across critical industries.

Require a Hard-to-Source Component?

Submit your complete material specification to our procurement team for structured evaluation and sourcing support.

DESIGN SUGGESTION FOR THIS SECTION

If implemented as a half-page column within Procurement page:

Left Column:
Text (Specification-driven sourcing explanation)

Right Column:
Image grid of:

- Electrical panels
- Valve assemblies
- IT control racks
- Pump/motor components

If implemented as full page:

Use:
• Section headers
• Clean spacing
• Industrial images with white background
• Subtle blue or charcoal section dividers

IMPORTANT POSITIONING NOTE

Notice the tone:

We did not say “we can source anything.”

We said:

“We source based on complete specifications and structured verification.”

That is professional.
That builds credibility.
That protects your brand.

C. TECHNICAL SUPPORT & MAINTENANCE

Fast-Response Maintenance That Keeps Equipment Running

Wilsolvewel Nigeria Limited provides **professional technical support and maintenance services** for heavy-duty machinery and power systems, focused on **rapid response, accurate diagnostics and reliable equipment performance**.
We support clients by minimizing downtime through **structured troubleshooting, corrective maintenance and overhaul services**, ensuring equipment operates safely, efficiently and within design limits.

Client Challenges We Address

Equipment-dependent operations often experience:

- **Unexpected equipment breakdowns** that disrupt production and project timelines
- **Extended downtime** due to delayed response or ineffective repairs
- **Poor diagnostics and repeated failures**, increasing maintenance costs and operational risk
- **Lack of skilled technical personnel** for complex equipment and power systems

Our Technical Support Services

We provide a comprehensive range of technical support services, including:

- **Emergency and corrective maintenance** for heavy-duty machinery and power systems
- **Engine repair and overhaul**, restoring performance and reliability
- **Alternator and electric motor reconditioning**, ensuring optimal electrical output
- **Power plant support**, including fault diagnosis and performance optimization
- **Installation, commissioning and technical supervision** for equipment and systems

- **Man power supply and power management,** provision of skilled technicians**,** engineers and project supervisors for short-term and long-term contracts
- **Training & consultancy,** delivery of structured technical training programs and expert consultancy, specializing in the use of Caterpillar Diagnostic Tools, Electronic Technician and Service Information System, to enhance operational competence and system performance

All services are delivered by **experienced technicians and engineers**, using safe work practices and industry-approved procedures.

Clients rely on Wilsolvewel for technical support because we provide:

- **Fast response times** during breakdown and emergency situations
- **Accurate diagnostics** that address root causes, not symptoms
- **Experienced technical personnel** with hands-on industrial expertise
- **Reduced downtime and extended equipment life**
- **Safe, compliant and well-documented maintenance execution**

When equipment fails, Wilsolvewel responds fast.
Contact us for reliable technical support that restores performance, protects asset and keeps your operations running efficiently.

HOW WE WORK (OUR OPERATIONAL APPROACH)

Wilsolvewel follows a **structured and transparent execution process** to ensure consistent service quality and client satisfaction:

- **Needs Assessment** – Understanding client requirements, site conditions and operational challenges
- **Planning & Engineering Review** – Developing a clear technical and execution plan
- **Execution** – Deploying skilled personnel, tools and resources to deliver results
- **Quality & Safety Control** – Implementing inspections, testing and compliance checks
- **Handover & Follow-Up** – Providing documentation, support and post-service assistance

This approach ensures **safe execution, technical accuracy and dependable outcomes**.

SELECTED PROJECT PROOF

Wilsolvewel has supported clients across various industries with engineering, procurement and technical services, including:

- Gas turbine alternator commissioning support
- Industrial pump installation and testing
- Heavy equipment maintenance and rehabilitation
- Power plant technical support
- Civil works supporting industrial and infrastructure projects

Our experience demonstrates our ability to **deliver practical solutions in demanding operational environments**.

OBOB Gas Turbine Commissioning – AGIP (2021):
Commissioning of gas turbine alternator to ensure peak performance.

Client: Triumph Power and Gas System Ltd

Export Line Crude Oil Pump Installation – New Cross E&P (2023):
Installed and tested pumps for crude oil export flow improvement.
Client: Future Oilfield Services ltd

Rehabilitation/Maintenance of Tower crane – The Carpenter's Church (2025):
Church Auditorium building project.
Client: The Carpenter's Church, Green Ville

Product Support – Lee Engineering & Construction ltd (2025):
Repair of Heavy- duty machineries and Procurement of parts.
Client: Lee Engineering & Construction ltd

Cathedral Project Equipment Maintenance – Salvation Ministries (2024 – 2025):
Equipment technical support and consultancy
Client: Salvation Ministries

Solar Borehole Drilling Project at Ogbele – Aradel Holdings PLC (2024 – 2025)
Sub – Contract
Client: Point link Integrated Services Nigeria limited

WHY CLIENTS CHOOSE WILSOLVEWEL

Clients partner with Wilsolvewel because we provide:

- Fast response to minimize downtime
- Engineering-led service delivery
- Verified global procurement and logistics partners
- Skilled technicians and experienced engineers
- Strong commitment to safety, quality and compliance
- Transparent communication and professional documentation

We focus on **long-term partnerships**, not one-off transactions.

COMPLIANCE, SAFETY & QUALITY

Wilsolvewel operates in line with **industry best practices, OEM specifications and Health, Safety & Environment (HSE) requirements**.

We are committed to:

- Safe work practices
- Regulatory compliance
- Quality assurance
- Environmental responsibility

Our operations prioritize **people safety, asset protection and sustainable performance**.

CLIENT BENEFITS

Clients of wilsolvewel Nigeria limited should expect:

- High-quality engineering expertise

- Reliable and cost-effective procurement
- Strong technical support and field service
- Compliance with standards and safety practices
- Clear communication and project transparency
- Greater operational value and efficiency

CLIENTS & PARTNERS

We have worked with multinational corporations, Local businesses and government agencies. Our partnerships with OEMs ensure quantity and reliability.

CORPORATE SOCIAL RESPONSIBILITY (CSR)

Our CSR efforts focus on skill development, community engagement and local employment generation.

MANAGEMENT TEAM

Led by experienced professionals in engineering, procurement, technical support, finance and business development, our team drives strategic growth while delivering excellence.

Call to Partner with Us

At Wilsolvewel Nigeria Limited, we don't just provide services — we build partnerships that last. Our team is ready to work with you to deliver engineering, procurement solutions and technical support that drive efficiency, safety and profitability. Let's achieve success together.

Let’s Work Together

Wilsolvewel Nigeria Limited is ready to support your engineering, procurement and technical needs.

Contact us today to discuss your project requirements, equipment challenges or supply needs. Our team will assess your situation and deliver solutions that keep your operations running efficiently and safely.
